

# HAND PALLET TRUCK

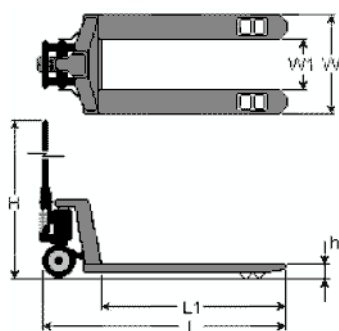

WITH **2500KG CAPACITY**

model  
**GN0845**

max  
KG  
2500

Model GN0845, Capacity 2500KG

- Available in widths 450, 540 & 685 mm.
- A range of 3 widths, as well as lengths from 600 to 1220mm means that there should always be a truck to suit your needs.
- The extremely reliable pump unit is fitted with a pressure relief valve to prevent overloading.
- 3-Position trigger; Lift, Lower + Neutral.
- The robust chassis is reinforced at the 'A' frame and the legs are strengthened along their length. To reduce maintenance needs, all pivot points are bushed with grease points.
- With safety in mind, all machines can be fitted with 3 different braking systems.
- Trucks carry CE mark and comply with all current safety legislation.
- The one piece pump design sealed integrated simplifies repairs, assuring reliable services and long life.

All trucks can be supplied with single or tandem rollers on request
