

Power-Assisted Cage Trolley with Shelves

This power assisted cage trolley has a lockable full security cage surround with internal shelves. Designed as a parcel cage trolley, this platform truck is highly mobile and easy to manoeuvre. Thanks to the lockable side-opening doors, this trolley is extremely popular for internal distribution of post and/or sensitive information. The user has quick access to content on either shelf, which are designed to comfortably fit industry standard 400mm x 600mm boxes side by side.

The powered motor system has a range of safety features included, such as a reversing audio beacon, adjustable speed, an emergency stop button, as well as a dead man braking system that locks the motor wheels when the throttle is released. The motor has a 24km range on average ground conditions, and the rechargeable battery is supplied with an easy to use plug-and-charge unit that can be fitted into any UK wall socket. The battery is also replaceable, and spares are available on request.

The trolley also has a number of optional extras available, such as key card or keyless entry in place of the standard key locking system, non marking corner bumpers (as seen in product photos), amber flashing safety beacons (as seen in product photos), non-marking wheels for internal use, and more. For availability and pricing of these optional extras, please contact the team.

Powered Trolley Training

We are now offering on-site powered trolley operation training for anywhere in the UK. Training for groups of up to 6 people starts at £360 per day, plus travel/accommodation expenses. To arrange training, please contact sales@handle-it.com, or call +44 (0)1803 875 222.
